Unmanned IPV Insurance Concerns

Julie Mileham, AIC, ARM-P, CPCU, MBA
Risk Manager

COLORADO

Department of
Transportation

- Avalanche Mitigation
- Unmanned Aerial Vehicles
- Smart Roads
- Smart Cars
- Smart Work Zones
- Unmanned Mobile Attenuator**

All are related and the risks are evolving

Emerging Technologies

COLORADO

Department of
Transportation

Evaluate Risks

COLORADO

Department of
Transportation

Is the Vehicle insured for damage to the unit itself?

- Theft, fire, accident...
- Does the policy allow for replacement cost or actual cash value?
- Does the policy cover the “technology” of the unit – software, updates, loss of use, items permanently installed, etc?

Property Damage

COLORADO

**Department of
Transportation**

- Distraction of people on the road causing damage or injury
- Accident with others on the road causing damage or injury
- Accident with your other units (or people)
- Misuse by employees
 - ✓ Training Requirements
 - ✓ Fitness for Duty
 - ✓ Authorized Users/Tasks
 - ✓ Avoid negligent entrustment/retainage
 - ✓ Regular/preventive maintenance – software?
- State Laws – Colorado had to write one
- Fail Safe System: signal interference, use in bad weather, loss of power, hacking, product/software issues

Liability Risks

COLORADO

Department of
Transportation

- Does your State have governmental immunity?
- Does that immunity address unmanned vehicles
Colorado law states a vehicle must be driven by a “State employee”
- Is your State self-insured?
- If there is an insurance policy, does the carrier want certain requirements met?
- Review the activities and program with your broker and/or carrier – are there exclusions, coverage gaps or overlaps (auto/GL/products completed). Read the fine print!
- Indemnification from the software designer/manufacturer
- What does the ongoing support look like from the software company?

Fines and punitive damages are not insurable – know the risk!

Liability Coverage

COLORADO

Department of
Transportation

- Auto Liability – the lead vehicle, the tethered vehicle
- Terrorism – foreign/domestic
- Cyber Coverage – hacking, what information is stored, etc.
Protection of Proprietary Property
- Products Liability – seek indemnification from the software company – move away from the auto liability
- Professional Liability – engineering

Other Coverage

COLORADO

Department of
Transportation

Loss Prevention Tips

- Roles and responsibilities – many players – government and private parties
- Develop protocols and safety programs – and follow them!
- Training/Retraining, Safety, Emergency Response
- Accident Review Board – lessons learned and update protocols if necessary
- Testing documentation and videos – keep these!
- Document, document, document

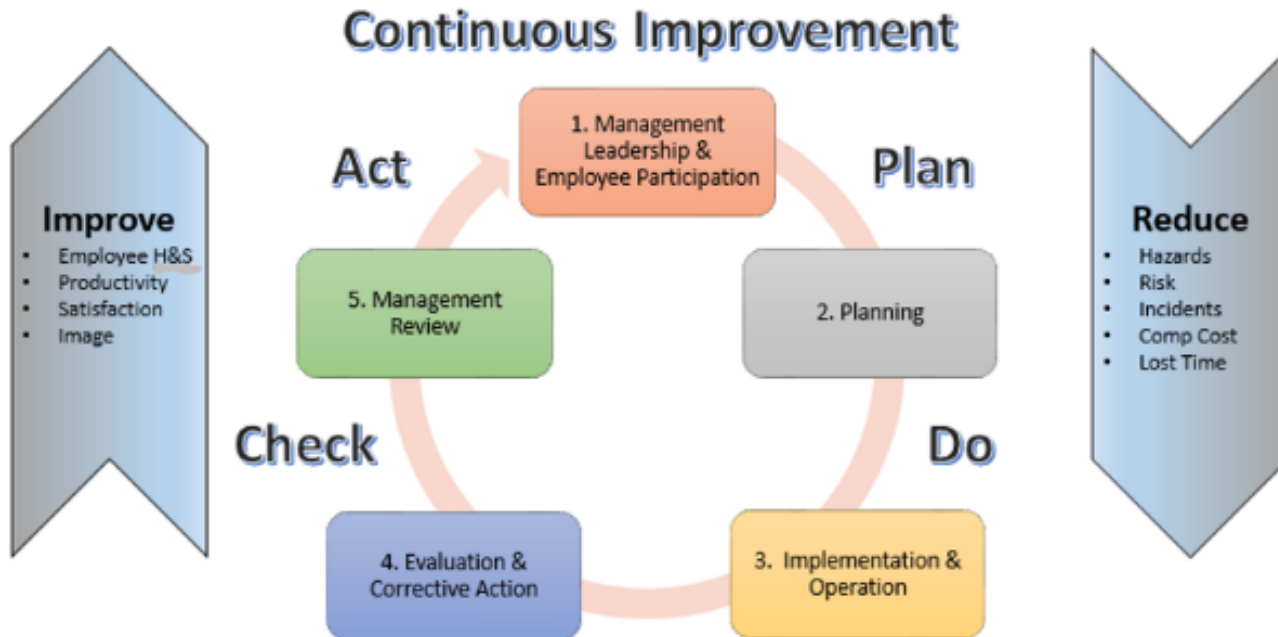

Loss Prevention

COLORADO

Department of
Transportation

This is a quickly changing environment, stay current and strive to be accident free!
